Assignment 1 - Git

- By M G Ishaque

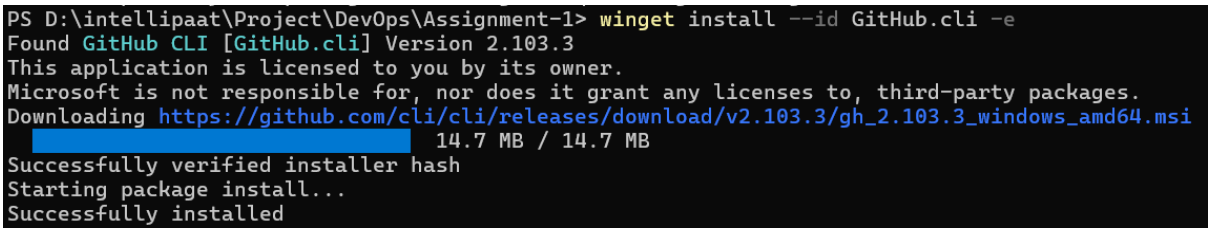

Tasks To Perform:

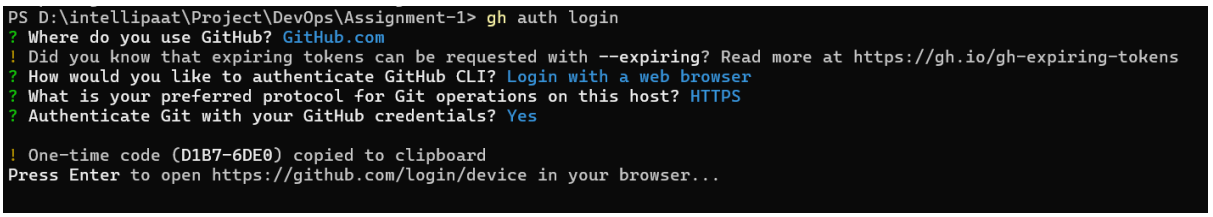

1. " Based on what you have learnt in the class, do the following steps:
    a. Create a new folder
    b. Put the following files in the folder
        i. Code.txt
        ii. Log.txt
        iii. Output.txt
    c. Stage the Code.txt and Output.txt files
    d. Commit them
    e. And finally push them to GitHub
2. Please share the commands for the above points".

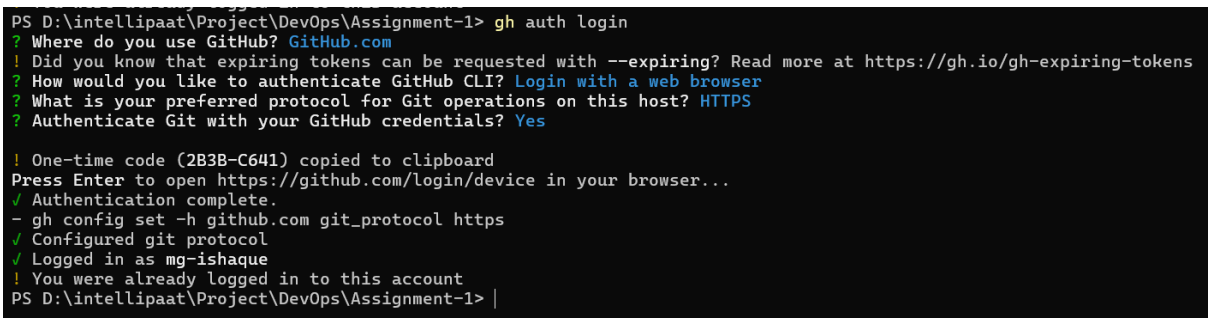

Solution

1. **Prerequisites: Installed Git and GitHub CLI**

```
winget install --id Git.Git -e
winget install --id GitHub.cli -e
```

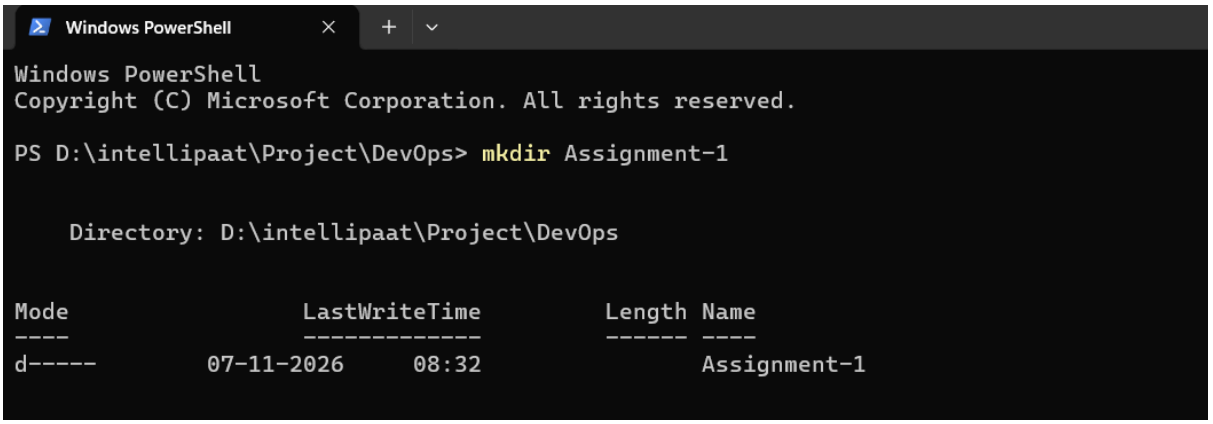

2. **Verified installations**
   (reopened PowerShell)

```
git --version
gh --version
```

```
PS D:\intellipaat\Project\DevOps\Assignment-1> git --version
git version 2.55.0.windows.5
PS D:\intellipaat\Project\DevOps\Assignment-1> gh --version
gh version 2.103.3 (2026-10-26)
https://github.com/cli/cli/releases/tag/v2.103.3
```

3. **Created a new folder**

```
mkdir Assignment-1
```

4. **Navigated into the folder**

```
cd Assignment-1
```

```
PS D:\intellipaat\Project\DevOps> cd Assignment-1
PS D:\intellipaat\Project\DevOps\Assignment-1>
```

5. **Initialized Git repository and Set the branch name to main**

```
git init
git branch -M main
```

```
PS D:\intellipaat\Project\DevOps\Assignment-1> git init
Initialized empty Git repository in D:/intellipaat/Project/DevOps/Assignment-1/.git/
PS D:\intellipaat\Project\DevOps\Assignment-1> git branch -M main
```

6. **Created three text files**

```
New-Item Code.txt, Log.txt, Output.txt -ItemType File
```

```
PS D:\intellipaat\Project\DevOps\Assignment-1> New-Item Code.txt, Log.txt, Output.txt

    Directory: D:\intellipaat\Project\DevOps\Assignment-1

Mode                 LastWriteTime         Length Name
----                 -------------         ------ ----
-a----        07-11-2026     08:33              0 Code.txt
-a----        07-11-2026     08:33              0 Log.txt
-a----        07-11-2026     08:33              0 Output.txt
```

7. **Staged only Code.txt and Output.txt and Committed the staged files**

```
git add Code.txt Output.txt
git commit -m "Add Code.txt and Output.txt"
```

```
PS D:\intellipaat\Project\DevOps\Assignment-1> git add Code.txt Output.txt
PS D:\intellipaat\Project\DevOps\Assignment-1> git commit -m "Added Code.txt and Output.txt"
[main (root-commit) 0bc5d1f] Added Code.txt and Output.txt
 2 files changed, 0 insertions(+), 0 deletions(-)
 create mode 100644 Code.txt
 create mode 100644 Output.txt
```

8. **Created a public repository on GitHub**

```
gh repo create mg-ishaque/Assignment-1 --public
```

```
PS D:\intellipaat\Project\DevOps\Assignment-1> gh repo create mg-ishaque/Assignment-1 --public
✓ Created repository mg-ishaque/Assignment-1 on github.com
  https://github.com/mg-ishaque/Assignment-1
PS D:\intellipaat\Project\DevOps\Assignment-1>
```

9. **Added origin and verified origin**

```
git remote add origin https://github.com/mg-ishaque/Assignment-1.git
```

```
PS D:\intellipaat\Project\DevOps\Assignment-1> git remote -v
origin  https://github.com/mg-ishaque/Assignment-1.git (fetch)
origin  https://github.com/mg-ishaque/Assignment-1.git (push)
```

10. **Pushed the commit to GitHub**

```
git push -u origin main
```

```
PS D:\intellipaat\Project\DevOps\Assignment-1> git push -u origin main
Enumerating objects: 3, done.

To https://github.com/mg-ishaque/Assignment-1.git
 * [new branch]      main -> main
branch 'main' set up to track 'origin/main'.
PS D:\intellipaat\Project\DevOps\Assignment-1>
```

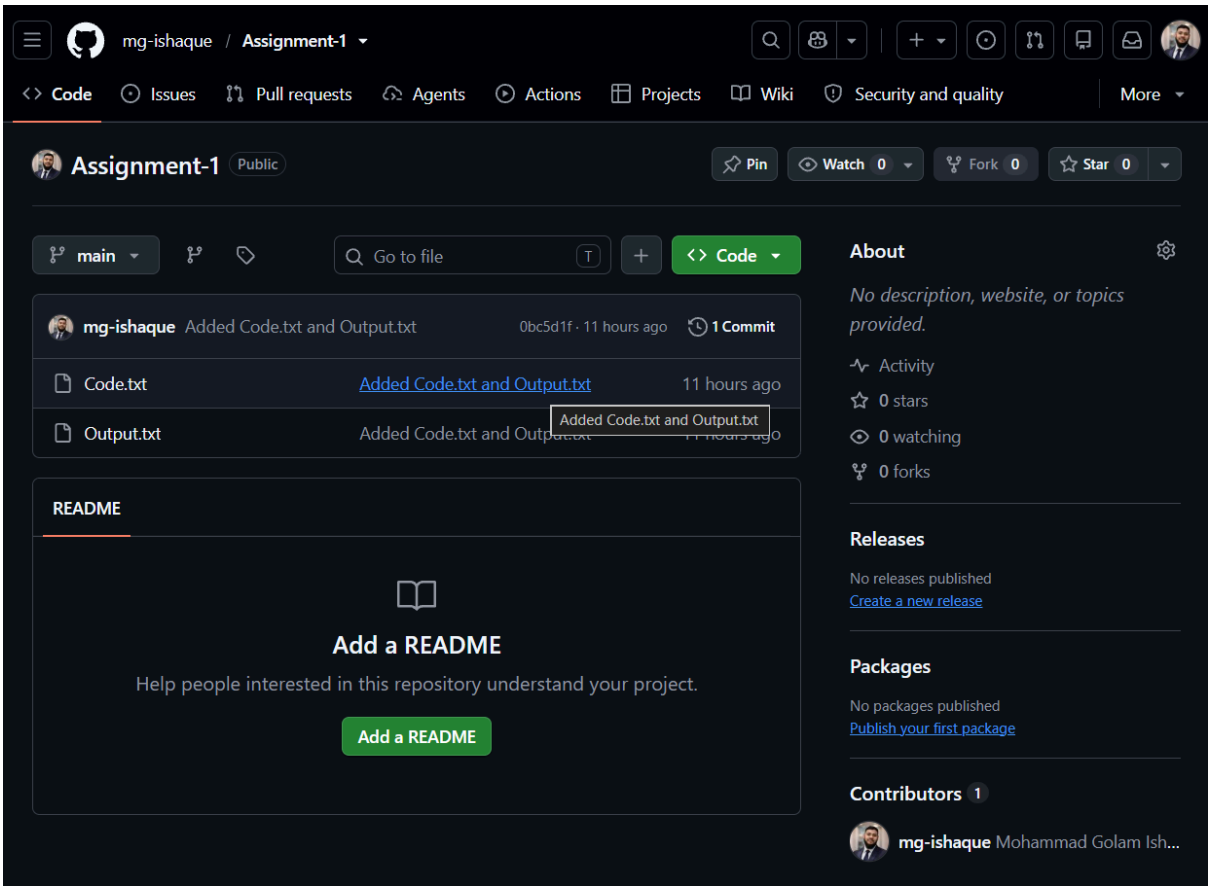

11. Verification: Opened the repository on GitHub

`gh repo view mg-ishaque/Assignment-1 --web`

```
PS D:\intellipaat\Project\DevOps\Assignment-1> gh repo view mg-ishaque/Assignment-1
mg-ishaque/Assignment-1
No description provided

This repository does not have a README

View this repository on GitHub: https://github.com/mg-ishaque/Assignment-1
PS D:\intellipaat\Project\DevOps\Assignment-1>
```

List of Git commands used

To install Git and GitHub CLI in windows

```
winget install --id Git.Git -e
winget install --id GitHub.cli -e
```

To verify installations

```
git --version
gh --version
```

To authenticate with GitHub

```
gh auth login
```

To initialize Git repository

```
git init
```

To set the branch name to main

```
git branch -M main
```

To check Git status

```
git status
```

To stage only Code.txt and Output.txt

```
git add Code.txt Output.txt
```

To commit the staged files

```
git commit -m "Add Code.txt and Output.txt"
```

To create a public repository on GitHub

```
gh repo create mg-ishaque/Assignment-1 --public
```

To add origin

```
git remote add origin https://github.com/mg-ishaque/Assignment-1.git
```

To check origin

```
git remote -v
```

To push the commit to GitHub

```
git push -u origin main
```

To verify commits and tracked files

```
git log --oneline
git ls-files
```

To open the repository on GitHub

```
gh repo view mg-ishaque/Assignment-1 --web
```

Windows cmd commands used

To create a new folder

```
mkdir Assignment-1
```

To navigate into the folder

```
cd Assignment-1
```

To create three text files

```
New-Item Code.txt, Log.txt, Output.txt -ItemType File
```
